Description

Project Overview:

We are seeking a qualified architectural and construction contractor to develop and implement plans for extending an interior emergency exit to connect with the exterior emergency exit in compliance with Quebec's RBQ safety standards.

Scope of Work:

1. Assess the current emergency exit layout and identify the necessary modifications.
2. Develop architectural plans for extending the interior emergency exit path to meet the exterior exit.
3. Ensure the extended emergency exit meets all QC RBQ fire and safety compliance standards.
4. Oversee the construction and installation of any required structural or mechanical components.
5. Perform a final safety inspection to confirm compliance.

Qualifications:

- Licensed architectural and construction professionals familiar with QC RBQ standards.
- Proven experience in emergency exit design and construction.
- Ability to work within strict timelines and ensure regulatory compliance.

Submission Requirements:

- Proposed timeline and cost estimate.
- Detailed architectural plans outlining modifications.
- Proof of qualifications, licenses, and insurance.
- References from similar projects.
